

FUMAREXIN

Fumarexin® - injection therapy - The smoker's weaning by means of the Fumarexin® - injection therapy is a natural support for the patient. Stopping is made easier to the patient by the combination of acupuncture and homoeopathy. Physical withdrawal symptoms are lifted strongly decreased to completely. Under it there fall nervousness, aggressions, sleeping disturbances, sweat outbreaks and the desire for nicotine. A unique treatment is in most cases enough. Supporting a decontamination therapy is carried out after the treatment. This measure with the help of the Fumarexin®-Anti-Raucher-Kapseln is indispensable for the physical denial and the elimination of the nicotine and other free radicals. Duration of the decontamination therapy: 1 – 3 months (according to strength of the nicotine dependence).

Metabolism programme „Healthy and active“ - with the help of this programme, treat metabolism illnesses as for example diabetes, furnace mouth, rheumatism and also improve other internal illnesses. Already after a short time discomfort becomes like sleeping disturbances, digestive problems etc. repaired. With this therapy 41 blood values are examined and ascertained on account of that the individual metabolism situation of the patient. Metabolism derailments can be repaired by this extremely exact investigation of the values. The patient receives an individual food plan to which he should strictly keep for approx. 6 – 8 weeks. During this time he finds out an intensive care by his remedial practical person. After this time the values can be checked again. Of course the care is also guaranteed in the preservation phase.

Aesthetic cosmetics - the antiwrinkle treatment with hyaluronic acid is a natural alternative to Botox treatments. Hyaluronic acid is material belonging to body which owns very strong water-storing qualities. The product is injected under the wrinkle and therefore the success is visible directly after the treatment. The effect stops between 8 and 12 months. With hyaluronic acid one can carry out the following treatments: forehead, oral area, little ocular fold, lip volume and lip contour, low neckline and back of the hand. The stand of hyaluronic acid very feels well – one can name the allergy risk almost with 0%.
